

## Tips and Tricks from IITians.

- 1) The foremost thing to remember in this topic is about Lorentz force.
  - And hence you need to ~~st~~ enhance the understanding of it.
- 2) In your previous chapters, you may encounter gravitation, you can relate most of the formulas from it.
- 3) Don't mess up things, study this topic in a structured manner, Pace up things slowly, Try example problems and then Previous year problems. You'll surely succeed.
