

This is a very important topic from the point of JEE Advanced exam. If you look at previous year's papers, you will find that there are more than 3 questions asked every single year on average. Also, it is not that difficult topic. You can easily understand this topic without putting much effort into this topic. There are broadly four subparts of this topic. It is also a basic topic for Physics, so you are also going to study this topic in your engineering Physics. If you have a good understanding of physics then you will be able to make it.
