

## **TIPS AND TRICKS**

- Always try to make your own notes in this chapter
- Making summary of the chapter in one single sheet will help to memorise it faster , of important terms, formula and concepts
- Understand every concept by taking practical examples in our environment, so that you will never forget ever.
- Always give a try to the questions at least two three times using your knowledge and use your notes for reference before referring to the solution.
- Always remember to revise the chapter in your mind whatever you have learnt in this chapter
- Try to derive the formula first, and then it will be easy to understand it.
