

An aromatic molecule will

(1999, 3M)

- (a) have  $4n$   $\pi$ -electrons
- (b) have  $(4n + 2)\pi$ -electrons
- (c) be planar
- (d) be cyclic

Aromatic molecule must.

- (b) have  $(4n + 2)\pi$  electrons.
- (c) be planar.
- (d) be cyclic.
