

- while doing Row or Column operations, WRITE DOWN the operations. This is really helpful and a good habit.
- Always keep in mind multiplication and division ARE NOT VALID operations for rows and columns.  
[We cannot divide  $R_1$  by  $R_2$ , etc.]
- Don't mix up Row and columns in the heat of the moment. Don't do  $R_1 \rightarrow R_1 + kC_3$ .
