

## **TIPS AND TRICKS**

- Always try to make your own notes for every chapter.
- Making summary of the chapter in one single sheet will help to memorise it faster, of important terms, formula and concepts.
- In this chapter, all topics are fundamental of Chemistry, so understand every concept carefully. Don't ever try to skip these topics in this chapter.
- Always give a try to the questions at least two three times using your knowledge and use your notes for reference before referring to the solution.
- Always remember to revise the chapter in your mind whatever you have learnt in this chapter
