

TIPS AND TRICKS

- Always try to make your own notes for every chapter.
- Making a summary of the chapter in one single sheet will help to revise it faster, of important terms, formula, and concepts.
- Always give a try to the questions at least two or three times using your knowledge and use your notes for reference before referring to the solution.
- Try to practice derivation of most formulas so that if you are stuck in applying formula then you can derive the formula there itself.

- Do not try to memorize the formula without applying them if you want to learn any formula, better try questions based on that formula it will help you in memorizing both formula and concepts.
- Always remember to revise the chapter in your mind whatever you have learnt in this chapter.
