

1. Thermodynamics is **not** concerned about_____.
- (i) energy changes involved in a chemical reaction.
 - (ii) the extent to which a chemical reaction proceeds.
 - (iii) the rate at which a reaction proceeds.
 - (iv) the feasibility of a chemical reaction.

Solution:

(iii) the rate at which a reaction proceeds

Explanation:

Rate of a reaction is dealt with by kinetics. Thermodynamics doesn't concern about rate
