

Q4

Range of Frequency distribution

$$= \text{Highest Value} - \text{Lowest Value}$$

$$= 120 - 71 = 49$$

Dividing this into 7 equal classes $\Rightarrow \frac{49}{7} = 7$

Class width = 7

\therefore Class Interval 1 120 - 113

Class Interval 2 113 - 106

Hence class interval 1 and 2 is 113 and 120

Difficulty \rightarrow Easy.
