

## TIPS AND TRICKS

- Always try to make your own notes for every chapter in a single sheet.
- Understand each concept and solve questions by yourself without referring to solutions first.
- Learn to derive the formula so that you can make your own formula even if you forget the formula.
- Understand and remember some concepts by taking practical uses in our environment, so that you will never forget it ever.
- Always remember to revise the chapter in your mind whatever you have learnt in this chapter.
