

- ❖ First of all try to identify from the question which elements are known to us and then use either sine law or cosine law accordingly.
- ❖ Use sine law when you know:-
  - Two angles and at least one corresponding side
  - Two sides and at least one of corresponding angle
  - Any one element of triangle and the circum-radius of triangle
- ❖ Use Cosine law when you know:-
  - All the three sides are known
  - At least two sides and one angle is known
