- 60. Assertion (A): Components of a mixture of red and blue inks can be separated by distributing the components between stationary and mobile phases in paper chromatography.
  - **Reason (R):** The coloured components of inks migrate at different rates because paper selectively retains different components according to the difference in their partition between the two phases.
  - (i) Both A and R are correct and R is the correct explanation of A.
  - (ii) Both A and R are correct but R is not the correct explanation of A.
  - (iii) Both A and R are not correct.
  - (iv) A is not correct but R is correct.
