

Tips and Tricks

- Try to be an active reader and problem solver to grasp any concept of any subject. By active I mean consistency. Consistency is everything.
- I have given similar types of problems in problem sections, try to solve them in timed manner. Timing your problem solving can make your study more efficient.
- Solve of lots of problems from other reference books and coaching notes that are given below each video.
- If you understnad how to solve specific kind of problems from this chapter then you should be more than okay. So understand theory from lectures and solve NCERT and EXEMPLAR problems, that should be more than enough for this chaper.
