

## → Tips and Tricks

- 1- First try to understand the concepts well then solve numericals.
- 2- Practice a lot of questions on chemical kinetics since it is topic of physical chemistry.
- 3- Make ~~a~~ your own short notes.
- 4- Don't just memorize the formula. Try to understand derivation also.
- 5- Practice questions from each topic on chemical kinetics as questions have been asked frequently in JEE MAINS and JEE Advanced from topics such as Rate law, Factors ~~a~~ effecting rate of reaction, catalysts, collision theory of chemical reactions and integrated rate equations.
