

## ⇒ Tips and Tricks

- 1- Since this topic is from inorganic chemistry so you need to revise this topic multiple times to remember the reactions and facts.
- 2- Make your own short notes of important chemical reactions and facts.
- 3- Practise questions after completing theory part. This would help in identifying the weak areas.
- 4- Go through previous year questions. This would help you in knowing the topics which are more important and also the nature of questions asked.
- 5- Read NCERTs ~~thor~~ thoroughly as questions are sometimes asked from NCERTs directly.
