Which one of the following structures represents the neoprene polymer?

$$\begin{array}{c} \leftarrow CH_2 - CH - \\ \downarrow \\ CI \end{array}$$

$$\overset{\text{c}}{\longleftarrow} \overset{\text{CH}_2}{\longleftarrow} \overset{\text{CH}}{\longrightarrow} \overset{\text{CH}}{\longrightarrow} \overset{\text{CH}_2}{\longrightarrow} \overset{\text{CH}}{\longrightarrow} \overset{\text{CH}_2}{\longrightarrow} \overset{\text{CH}}{\longrightarrow} \overset{\text{CH}_2}{\longrightarrow} \overset{\text{CH}}{\longrightarrow} \overset{\text{CH}_2}{\longrightarrow} \overset{\text{CH}}{\longrightarrow} \overset{\text{CH}_2}{\longrightarrow} \overset{\text{CH}_2}{\longrightarrow}$$

$$\begin{array}{c}
\left(-CH - CH_2 - \right)_{n} \\
C_6H_5
\end{array}$$

Which of the following structure represents the neoprene polymers?

$$\{CH_2 - C = CH - CH_2\}_n$$

(B)

(C) {CH₂ - CH₃

D) (CH-

C₆H₅ (Polye
